DETAILED ACTION

Reason for allowance

The following is an examiner's statement of reason for allowance: None of the references of record teaches or suggests the claimed Circuit Element Having a First Layer Composed of an Electrically Insulating Substrate Material, a Method for Producing a Circuit Element, Bispyridinium Compounds and their Use in Circuit Elements having:

- a monomolecular layer composed of redox-active bispyridinium molecules, which is arranged between the first layer composed of the electrically insulating substrate material and the second layer with the second electrically conductive material, with the bispyridinium molecules in the monomolecular layer being immobilized on the electrically conductive material which is in the form of at least one discrete area, and with bispyridinium molecules in the monomolecular layer making electrical contact with the second electrical material of the second layer, wherein electrically inert molecules are immobilized on the first layer which is composed of the electrically insulating substrate material, and which molecules form a matrix which surrounds the at least one discrete area with the monomolecular layer composed of bispyridinium molecules.

- Immobilizing redox-active bipyridinium molecules are immobilized as monomolecular layer on the at least one discrete area which is composed of the first electrically conductive material; immobilizing electrically inert molecules are immobilized on the first layer which is composed of the electrically insulating substrate material, whereby the electrically inert molecules form a matrix which surrounds the at least one area with the monomolecular layer composed of bipyridinium molecules; and applying a second layer with a second electrically conductive material to the layer composed of the electrically inert molecules and the bipyridinium molecules, whereby the bipyridinium molecules in the monomolecular layer make contact with the second electrical material of the second layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
